Being a frequent traveler on the US highways, I have become an avid listener to XM radio. I find that the entertainment available through their service helps me suffer through what may otherwise be a long and boring trip. I was very excited when hearing about also being provided local weather and traffic from cities across the United States.

As usual, I find it appalling that again, big money from rich lobbyish are again dictating what I can or cannot do as part of my public rights.

I strongly urge the FCC to reject the NAB's petition 04-160. As a taxpaying citizen and voter, it is my right to receive services that I can afford to pay for without a special interest group dis-allowing this same service.

Additionally, I would urge the NAB to pay their lobbyist to better spend their money to investigate ways to lower the fuel and prescriptions drug prices scandal presently plaguing the United States.
